DETAILED ACTION

1. This application has been reviewed. Original claims 1-13 are pending. The rejection cited stated below.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Cervello et al., U.S. Patent Application Publication No. 2002/0071448[hereinafter Cervello].

As per claims 1 and 10, Cervello a method for spoofing stations while transmitting data through a medium, the method comprising:

setting a duration value to a value other than a time period for a predetermined subsequent message transmission (see paragraph 0014);

and sending a signal containing the duration value during a contention free period,

wherein at least one of the stations is an obeying station that updates a network

allocation vector in accordance with the duration value, that records a reason why the

network allocation vector is updated(see paragraph 0017), and that determines when to

ignore a duration value of a subsequent signal sent during the contention free period

and when to obey (i.e., not interfere) the duration value of the subsequent signal based upon the reason why the network allocation vector is updated (see paragraph 0039).

As per claims 2-3, and 11-12 Cervello discloses the method of claim 1, further comprising responding to the subsequent signal when the duration value of the subsequent signal is ignored (see paragraph 0017 and 0036).

As per claims 4-9 and 13 discloses the method of claim 1, wherein the duration value represents a time period for suppressing transmissions by the obeying station (see paragraph 0036-0037).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
